Caveats: NONE

Ricky,

Please confirm that any split samples we collect on Thursday will be able to be submitted to the laboratory for Friday delivery. Having an issue on another site where the labs are closed due to the holiday weekend,

Thank you, Amy

Subject: [EXTERNAL] FW: Rolling Knolls - FCR-08 Pore-water samples Volumes at MW-13

Hello All,

It appears that ARCADIS does not have enough bags to conduct the pore water sampling (see below). Thus, the sampling will be postponed for Thursday.

Thanks,

Tanya

Tanya,

Unfortunately, we will not be able to proceed with pore-water sampling tomorrow as planned. The volumes you have provided below are double what was required for the last round. It will take approximately three weeks to order the additional passive diffusion bags needed to fulfill your required volumes. Once we have received the bags, we will schedule the field work.

If you would like to drop one of your MS/MSD samples for metals or cyanide, we would have enough volume to proceed tomorrow. Please let me know immediately if you would like to continue with this option so we can continue prepping for the sampling.

Should you have any questions or concerns regarding this email, please notify me upon receipt of this email.

Thanks,

Suzy
